

User Question:

Unsupervised learning using neural networks is clearly machine learning since it is utilising neural nets. However, some algorithms, k-means clustering, for example, are considered unsupervised learning...

Domain Extraction

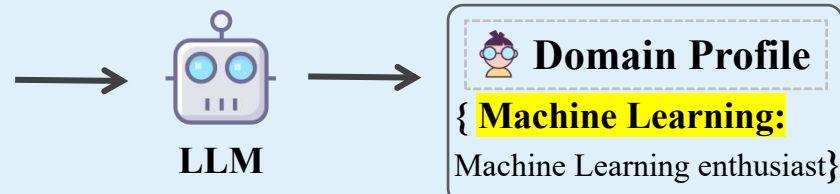

Prompt : You are an expert in { Machine Learning }.

Please tell me the profile the user who asked the query in { Machine Learning }. Please respond in JSON file format.

Question : Unsupervised learning using neural networks is clearly machine learning since it is utilising neural nets
